Assassin's Creed Valhalla - COLOR CO

HAVE YOU SEEN THE SCREENSHOTS ?
THE 1 FPS LOSS PERFORMANCE VERSION WILL

Why ? because the base of this preset is in the title : color correction, not extensive use of any heavy shaders. So the look of the game will literally be the same on any versions you choose. The XL version is simply a version with a little more fancy effects that we can't even see in any screenshots, Check the 3 screenshots comparison below if you're not convinced yet.

INSTALLATION

1. Install ReShade 4.8.2
 - a. Choose the folowing effects when installing

SweetFX by CeeJay.dk

qUINT by Marty McFly

Color effects by prod80

FXShaders by luloco 250

2. Download the COLOR CORRECTION preset and files
3. Put the Preset where the game.exe is located:
4. Start the game
5. Open ReShade menu and select **XXS** for a minimal performance hit. **XL** for maximum quality.

Optional

NEXUSMODS

2

Choose the **medium** setting for **Clouds** in Valhalla's settings.

I think they are very good looking and it saves a lot of FPS. (personnal opinion)

If playing at **1440p or even 4K**, try to use the **Low** setting for **AntiAliasing** in Valhalla's settings.

The Filmgrain and the Sharpness in the **XL** and **XS** presets is fine on it's own. (personnal opinion)

THANK YOU

TO

YBK123 & KIIR007 for helping me release the 1.3

MAIN EFFECTS

Lightroom@qUINT_lightroom.fx [some color correction changes]
prod80_04_ColorIsolation@PD80_04_Color_Isolation.fx [for the desaturated look]
